keeps
screen
printing
moving

The Viprominent HT50 and HT70 handprinting tables are very stable and constructed for the production of high quality screenwork. The anodized aluminium printbase is equipped with positive action micro-register adjustment in X, Y and Z plane. The frontal adjustable screenholder is appropriate to both large and small printing frames and the counterweight can be set to balance different frame sizes. The vacuum action is synchronized with the movement of the screen and the vacuum motor is powerful, but as important, it is quiet so the printer is not isolated from the rest of the printshop.

Sizes in mm	HT 50	HT 70
Maximum printing size	500 x 700	700 x 1000
Maximum frame size	770 x 970	970 x 1270
